RESEARCH EXPERIENCE

Lab Manager

Mind Perception and Morality Lab

PI: Dr. Kurt Gray

University of North Carolina-Chapel Hill

2017- 2018

Description: Continuing research on an NSF project entitled, “Confessional Reluctance and Ethics Enforcement: The Paradoxical Cost of Zero Tolerance”. Provide organizational support for lab members and develop research projects related to political and moral psychology with help from undergraduate research assistants.

Research Assistant

PI: Dr. Jan-Willem van Prooijen

Vrije University

2019

Research description: Conduct collaborative research project exploring whether viewing one's self as morally superior to political opponents leads to stronger beliefs in conspiracy theories focused on political adversaries intentionally causing harm. We predict this effect will occur due to a mediational pathway of perceived evilness.

Cognition and Development Lab

PI: Dr. Frank Keil

Yale University

2017

Research description: Assist a post-doctoral associate, Mark Sheskin with his work exploring whether political opponents can accurately predict the reasons why their adversaries hold certain political stances.

Early Childhood Cognition Lab

PI: Dr. Jessica Sommerville

University of Washington

2016

Research description: Collaborate with a research team to assist with research by collecting data, recruiting participants, and creating necessary stimuli for studies. Research topic explores children's' perceptions of same-race and different-race friendships.

Moral and Political Psychology Lab
Drew University
2015-2016

Research description: Collaborate with a research team to design studies about how political ideology and moral beliefs impact perceptions of civil disobedience. Further, develop a research project examining individuals' endorsement of welfare policies based on the political party endorsing the policy.
